

Silver Creek has 108 homes on its community, made up of 3, 4, and 5 bedroom villas. The majority of the villas are owned as vacation homes and are available for vacation rentals direct from the owner. The homes are typically managed by local management companies most of whom will operate a 24 hour emergency service.

One of Silver Creek's nicest features is **the colours of the villas**. The villas have all been painted in **calming pastel colours**, blending in well with the bright floral landscaping that adorns the community, giving it a nice Mediterranean feel.

All of the villas are of **modern construction** and were all built during 2004/2005. The community invest heavily in **landscaping and gardening**, something that sets it apart from many many other similar communities. As a result, the landscaping, especially the well manicured lawns, are the same high standard across the community.

All 108 homes have the following features as standard:

- A cable TV package which provides a minimum of 75 channels of varied entertainment – many owners will also offer much more than this, so do check with your owner.
- All have a luxurious heated swimming pool. Many homes have a spa/hot tub as an added facility.
- Telephone
- Air conditioning throughout the villa
- Ceiling fans for added comfort
- Many of our owners have converted their garage areas to Games Rooms, providing additional entertainment such as Air Hockey tables, Pool tables and Darts board.

Exact specifications will vary, so please always check with our owners.

We believe Silver Creek is a little bit of paradise - we're sure you will too!☺
